

TRUE BLACK HISTORY MUSEUM

Room Setups

MUSEUM ROOM SETUP

A total of 11 tables are needed. 10 tables for the exhibit with black linen table coverings with skirting, and 1 stand-alone table with 3 chairs for the staff. This stand-alone table does not require a table covering. The location of the stand-alone table will depend on the exhibit space. We also require a computer or laptop with internet access in this area, as we run a looping internet-based video of the TV or projector screens that compliments the exhibit.

** If the Purchaser has contracted the optional lecture add-on to the program (see page 1 of the contract), the Purchaser agrees to provide the following in addition to the above museum setup:*

LECTURE ROOM SETUP

Lecture could be in the same room or different room as the museum exhibit depending on space and anticipated audience. A microphone is needed for the lecture. An additional microphone may be needed for audience questions based on size of the lecture hall and audience. We also require a laptop for the lecture. We will bring a thumb drive with a clicker to advance the slides. The PowerPoint presentation does not require sound.
